

Key investor information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Salus Alpha Special Situations, a compartment of SALUS ALPHA SICAV

Class: P Shares (EUR), (Accumulation) LU1280955789

Objectives and investment policy

The Fund invests in all assets classes, equities, bonds, money markets instruments and recognized stock indices depending on the investment manager's expectation in relation to the economic situation, the capital markets and the evolution of the stock markets. The Fund tries to benefit from a so called "special situation", resulting from a change in capital structure or any other similar event relevant for the future earning of the relevant investment.

Under adverse market conditions the Fund can invest up to 100% of its assets in money market instruments, bank deposits with a maturity of up to one year and government bonds issued by Members States of the European Union or the European Economic Area (i.e. Germany, France, United Kingdom, Ireland, Italy, Spain, Belgium, the Netherlands, Finland, Austria, Norway, Liechtenstein), the European Financial Stability Facility (EFSF), the European Stability Mechanism (ESM), the International Bank for Reconstruction and Development, the European Investment Bank, Asian Development Bank, United States of America and Switzerland with any maturity. Bank deposits and cash may not exceed 49% of the Fund's net assets.

Under normal market conditions, the performance of the Fund is mainly determined by equities and bonds. The selection of the Fund's assets is based on the expectation that a special situation (e.g. bidding wars, privatization, Spin-Offs) for a company is resulting in a valuation improvement of the companies' debt or equity.

The Fund may as well use futures, options, swaps and other financial derivative instruments to hedge risks and to implement its investment policy.

The Fund is targeting the highest possible return.

The Fund is actively managed and it does not follow any benchmark.

The selection of the Fund's investments and the management of the Fund is based on the opinion of the Investment Manager Salus Alpha Capital Ltd.

The investor can buy or sell shares of the Fund on the 1st, 3rd and 5th (if any) Tuesday of each month (if not a business day in Luxembourg, the first following business day).

Incomes of the Fund are reinvested.

Recommendation: The Fund should be held for a period of 5 years or longer.

Risk and reward profile

With lower risk, With higher risk,

 potentially lower rewards potentially higher rewards

1	2	3	4	5	6	7
---	---	---	---	---	---	---

This indicator represents the annual historical volatility of the Fund over a 5-year period.

Risk Category 3 reflects limited potential gains and/or losses for the portfolio. This is due to investments in equities on the European market.

Historical data such as that used to calculate the synthetic indicator cannot be considered as a reliable indication of the Fund's future risk profile.

The risk category associated with the Fund is not guaranteed and may change over time.

The lowest risk category does not mean "risk free".

Your initial investment is not guaranteed.

Significant risk(s) for the Fund not taken into account in this indicator include the following:

Credit risk: The Fund invests in bonds, cash or other money market instruments. There is a risk that the issuer may default. The likelihood of this happening will depend on the credit-worthiness of the issuer. The risk of default is usually greatest with bonds that are rated as sub-investment grade.

Liquidity risk: Liquidity risk exists when particular investments are difficult to purchase or sell. This can reduce the Fund's returns because the Fund may be unable to transact at advantageous times or prices.

Operational risk: Risk of loss resulting from human errors, inadequate or failed internal systems, processes or controls or from external events.

Derivative for hedging purpose: The use of derivatives for hedging in a rising market may restrict potential gains.

Custody Risk: With respect to the custody of securities, the risk of losing assets due to insolvency, breaches of due diligence or abusive conduct on the part of the custodian or sub-custodian might exist.

Charges

The charges and commissions are used to cover the Fund's operating costs, including marketing and distribution of shares. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	3.00%
Exit charge	None
The percentage shown is the maximum amount that can be paid out of your investment. Your financial advisor or distributor can inform you of the associated entry and exit charges.	
Charges taken from the Fund over a year	
Ongoing charges	3.74%
Charges taken from the Fund under specific conditions	
Performance fee	No performance fees for the Fund's last financial year.
20% of the difference between the Net Asset Value (NAV) per Share and the highest NAV per Share recorded on any preceding Valuation Day ("high water mark").	

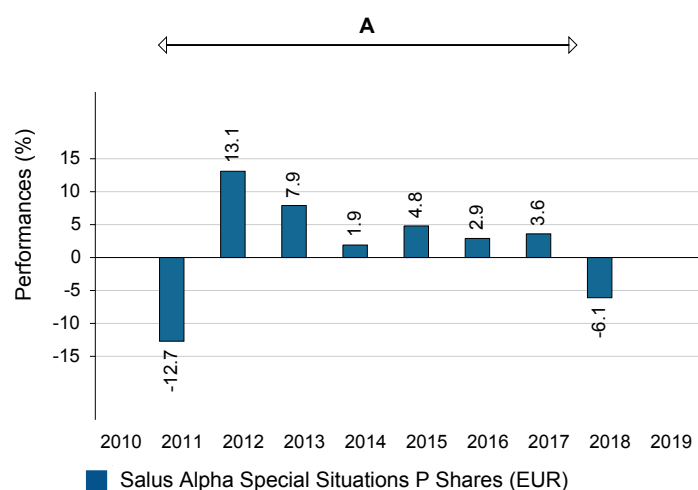

The entry and exit charges shown are maximum rates. In certain cases, the charges paid may be lower.

Ongoing charges are based on the charges for the previous year, ending on 31 December 2019. This percentage may vary from year to year. It excludes outperformance charges and intermediation charges, with the exception of entry and exit charges paid by the Fund when it buys or sells shares of another Fund.

A conversion fee of 1% of the converted shares' net asset value may be applied.

For more information about Fund charges, please refer to the relevant sections of the prospectus, which is available at www.salusalpha-sicav.com.

Past performance

The performance figures shown in the bar chart are not a reliable indication of future performance.

Annualised performance is calculated after deducting all charges taken from the Fund.

Fund creation date: 1 August 2016

Share class launch date: 19 July 2017

Base currency: Euro.

A : The performance figures shown in the bar chart are based on simulated performance pre-share class launch date. The simulated performance is based on the Salus Alpha Special Situations R EUR Share but does not take into account the lower management fee of 0.65% p.a. which would increase yearly performance by that amount.

Practical information

Depositary: CACEIS Bank, Luxembourg Branch

You can find other information about this Fund at www.salusalpha-sicav.com. You can obtain copies of a more comprehensive document on this Fund in English (the prospectus), as well as annual and semi-annual reports at any time, free of charge online at www.salusalpha-sicav.com.

This Fund consists of compartments, its latest consolidated annual reports are also available from www.salusalpha-sicav.com. Shareholders are entitled to convert all or part of their shares of a particular class into shares of other class(es) (as far as available) within the compartment or shares of the same or different classes (as far as available) of another compartment of Salus Alpha SICAV against payment of a conversion charge by application in writing to the central administration agent, stating which shares are to be converted and the target class(es) and/or compartment.

The Fund proposes other share classes for the categories of investors as defined in its prospectus.

The assets and liabilities of each compartment are segregated by law from each other.

The tax laws of Luxembourg, in addition to the tax laws of your country of residence, may impact how your investment in the Fund is taxed.
